

Triple Trouble Archery Grip manual

This manual applies to all archery grips produced and sold by Triple Trouble Archery.

Our grips come in a foam-protected package. If you find any cracks, damages or other abnormalities upon unpacking. Please reach out to us (tripletrouble1440@gmail.com). You might be eligible for our warranty program.

Installing your Triple Trouble Grip

1. Take your grip from the box
2. Take out the old grip you have set up on your riser using an suitable allen wrench to take out all bolts.
3. Set your new Triple Trouble grip* in place and tighten all bolts
4. Make sure to not over tighten the bolts. This risks damaging the grip and can result in even breaking it.
5. Take your bow out and have fun!

**If you need to use excessive force to set your grip in place, or the holes don't line up with your risers holes, please reach out to us on tripletrouble1440@gmail.com.*
